Enviva wants to build a new wood pellet facility in Lucedale, Mississippi. This plant would be the largest wood pellet plant in the world, cutting 130,000 acres of forests every year to be burned for electricity. We can't let that happen.

**WORLD'S LARGEST WOOD PELLET MILL PROPOSED FOR MISSISSIPPI**

IF BUILT,

**600,000 CARS ON THE ROAD**

This plant's greenhouse gas emissions will be equivalent to adding 600,000 cars on the road per year.

**500 MEGAWATT COAL PLANT**

Emissions from the plant and its pellets will be equivalent to a 500 megawatt coal plant.

**5 TOP FIVE POLLUTORS**

This facility will be one of the top 5 largest sources of greenhouse gas emissions in Mississippi.

**DON'T LET THIS HAPPEN**

Join forest protection nonprofit Dogwood Alliance and fight this plant: dogwoodalliance.org/no-enviva
