

WORLD'S LARGEST WOOD PELLET MILL PROPOSED FOR MISSISSIPPI

Enviva wants to build a new wood pellet facility in Lucedale, Mississippi. This plant would be the largest wood pellet plant in the world, cutting 130,000 acres of forests every year to be burned for electricity. We can't let that happen.

IF BUILT,

This facility will be one of the top 5 largest sources of greenhouse gas emissions in Mississippi.

TOP 5 POLLUTERS

DON'T LET THIS HAPPEN

Join forest protection nonprofit Dogwood Alliance and fight this plant
